

Prosser (2023) Figure 4 — his layout, his titles, drawn on HIS y axes
blue crosses: our 42 annual values · red crosses: our fitted 1979 and 2020 · solid green: significant at $p=0.05$
under each panel: his printed rel/abs/p, then ours (rel = % change 1979→2020, abs = slope in %/yr)

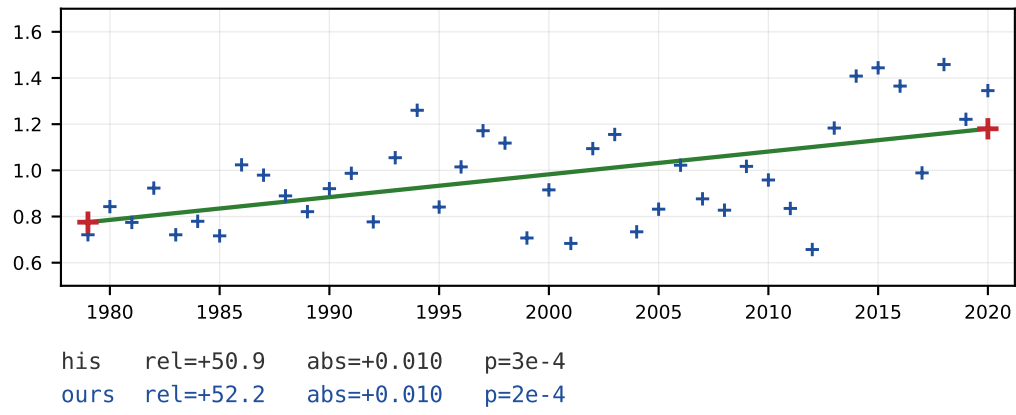

Negative Richardson number
(a)

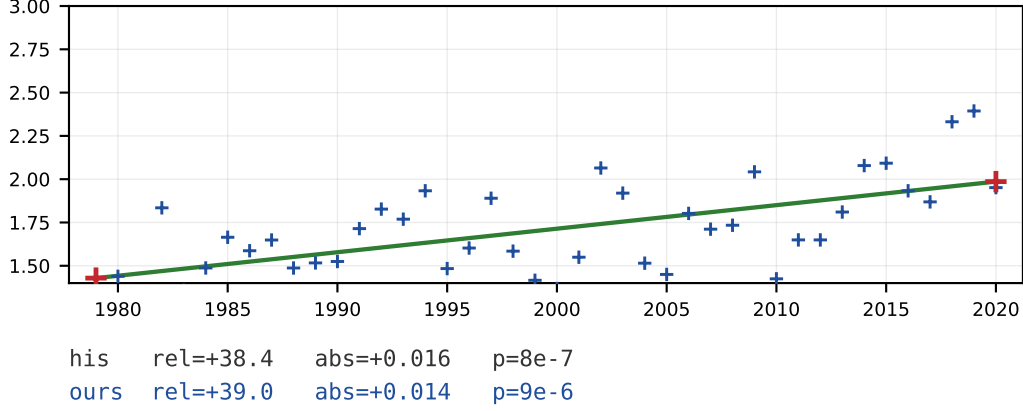

Variant 2 of Ellrod's turbulence index
(h)

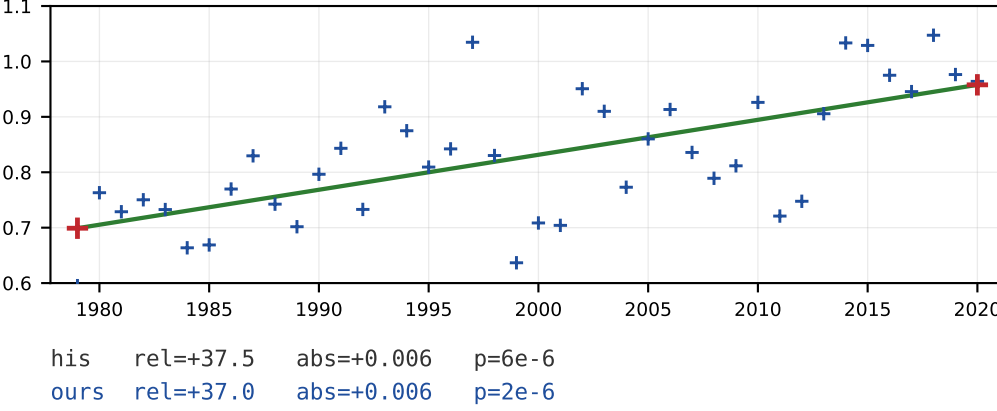

Flow deformation times wind speed
(o)

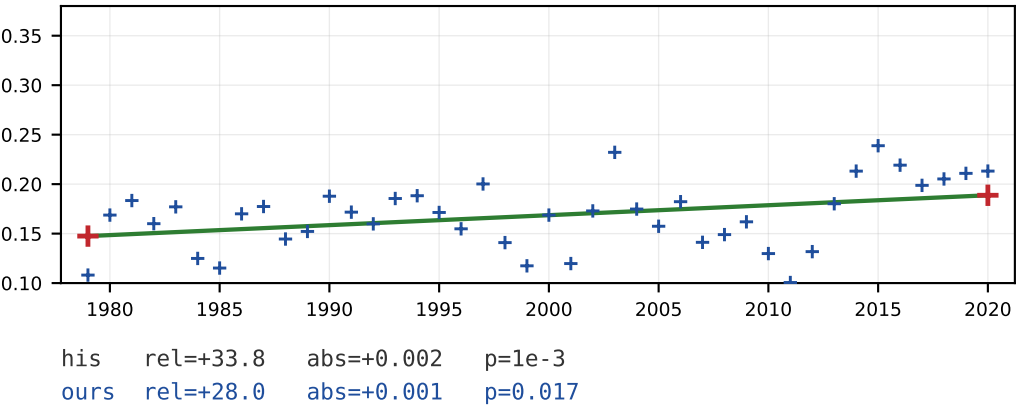

Magnitude of vertical shear of horizontal wind
(b)

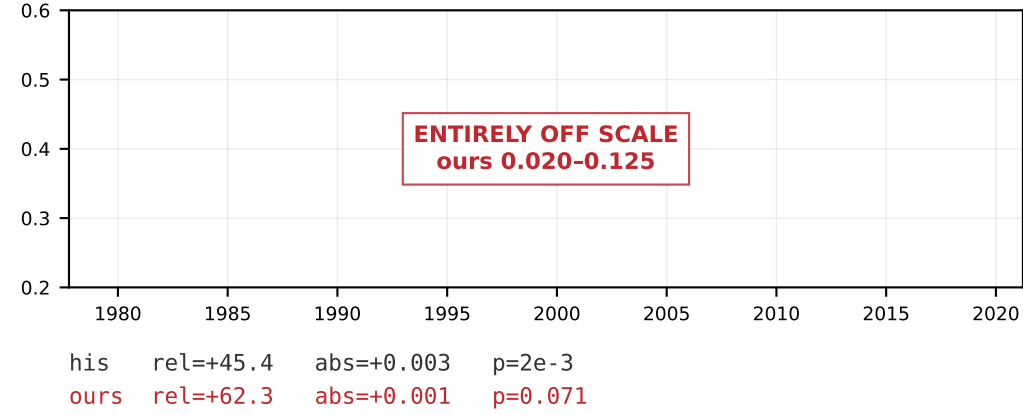

Flow deformation
(i)

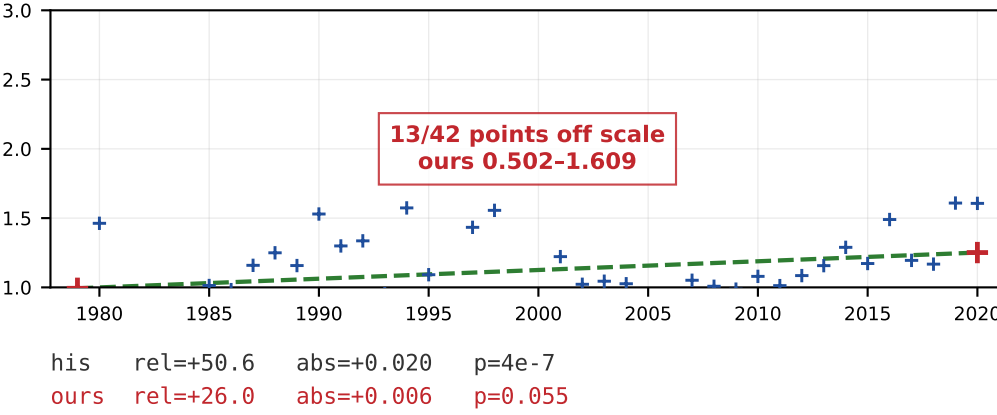

Flow deformation times vertical temperature gradient
(p)

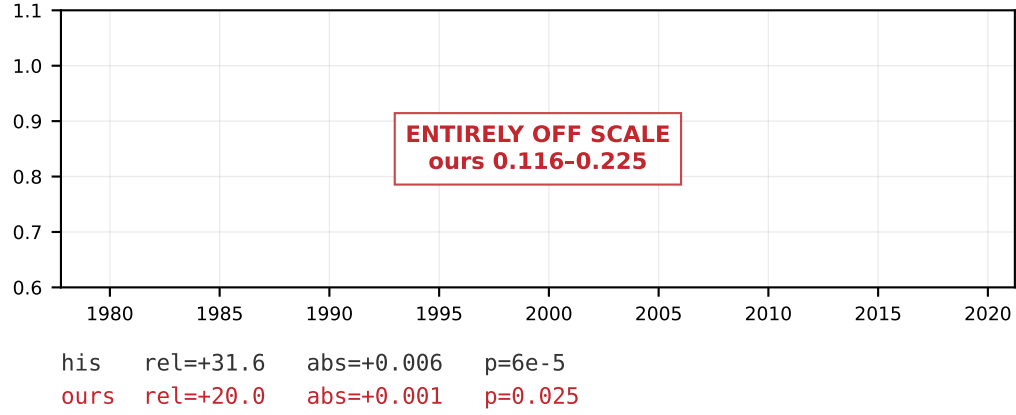

Colson-Panofsky index
(c)

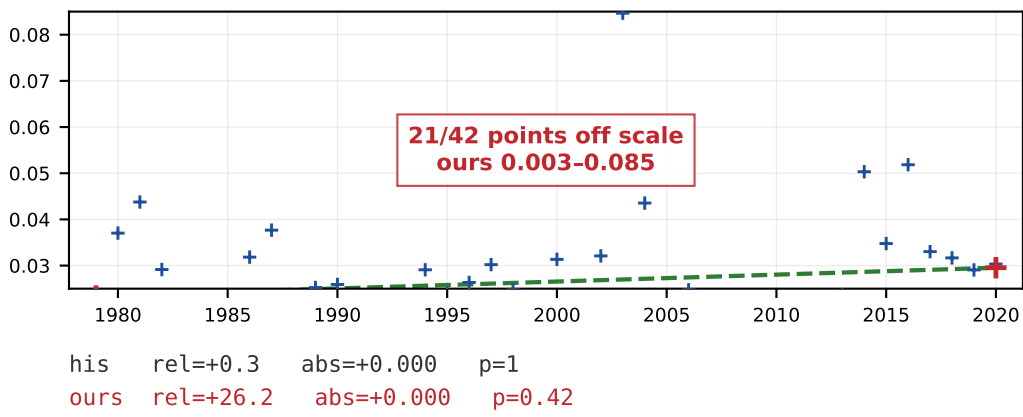

Magnitude of potential vorticity
(j)

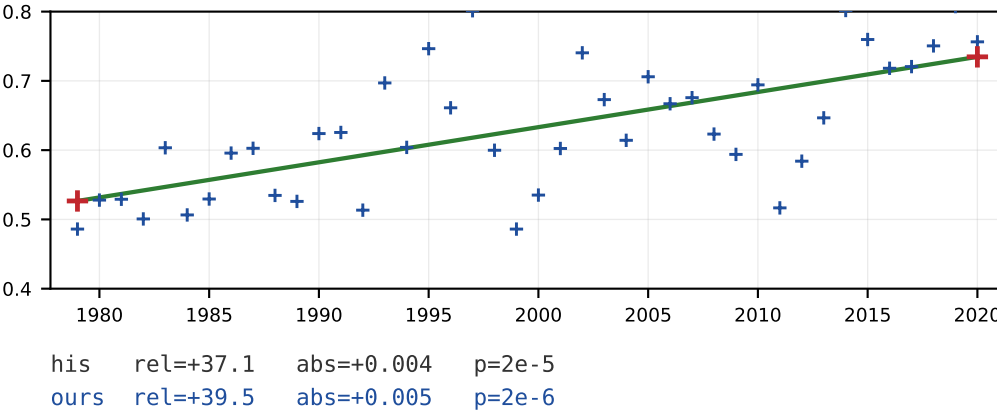

Magnitude of residual of nonlinear balance equation
(q)

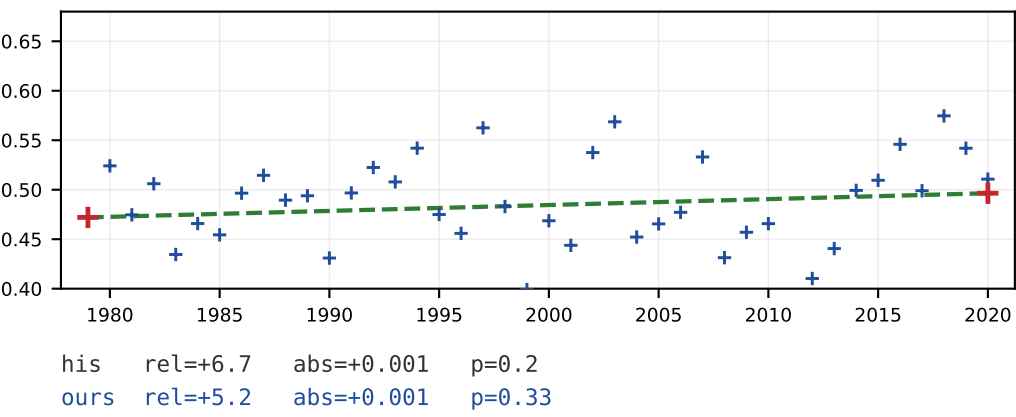

Frontogenesis function
(d)

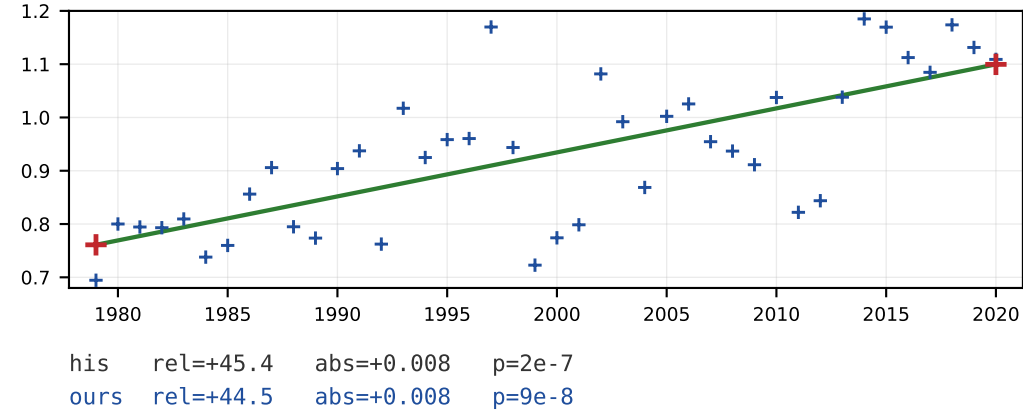

Relative vorticity squared
(k)

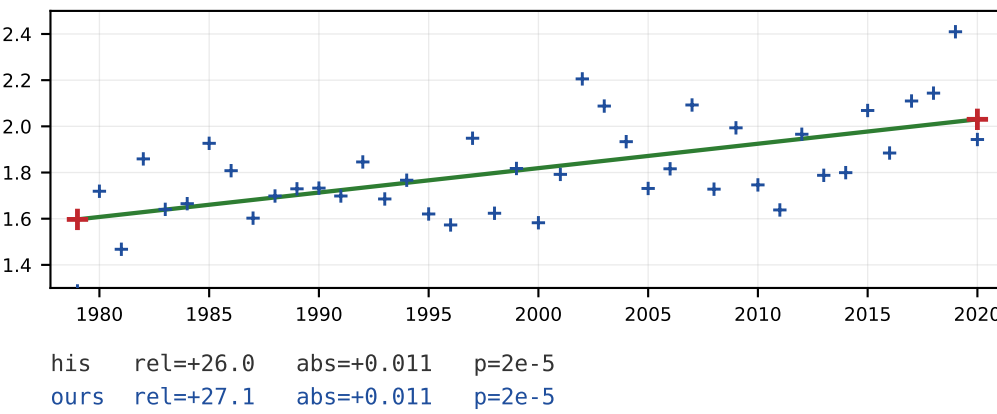

Magnitude of horizontal divergence
(r)

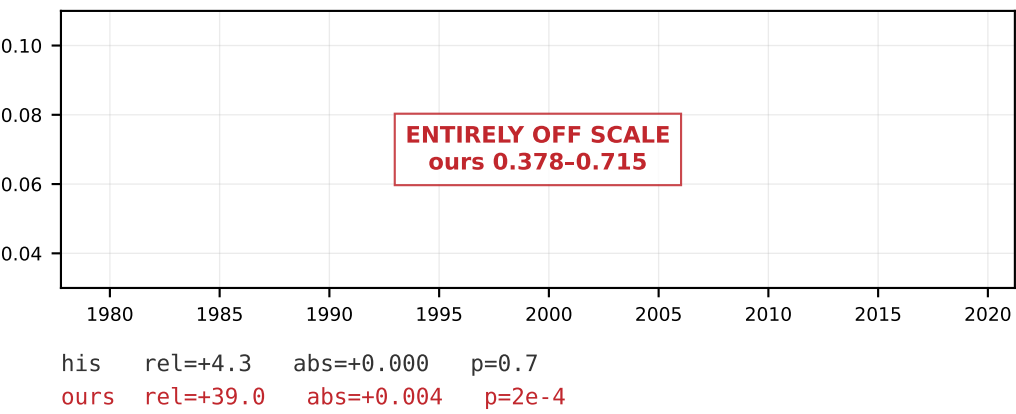

Brown index
(e)

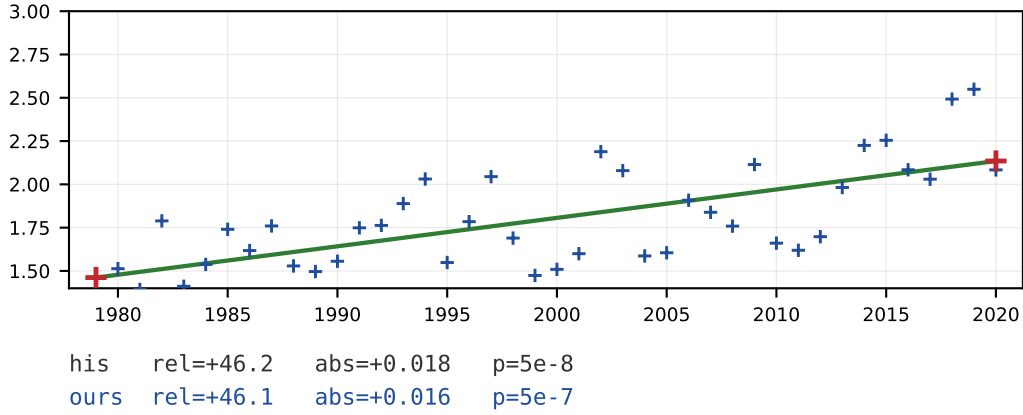

Magnitude of horizontal temperature gradient
(l)

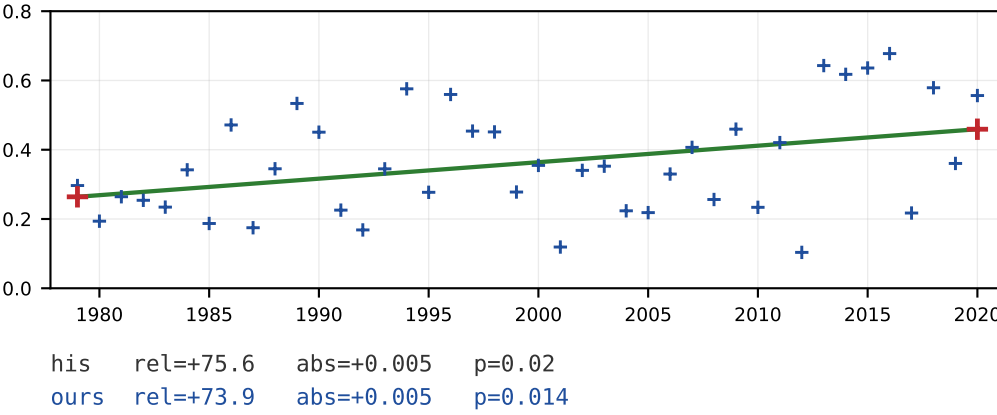

Version 1 of North Carolina State University Index
(s)

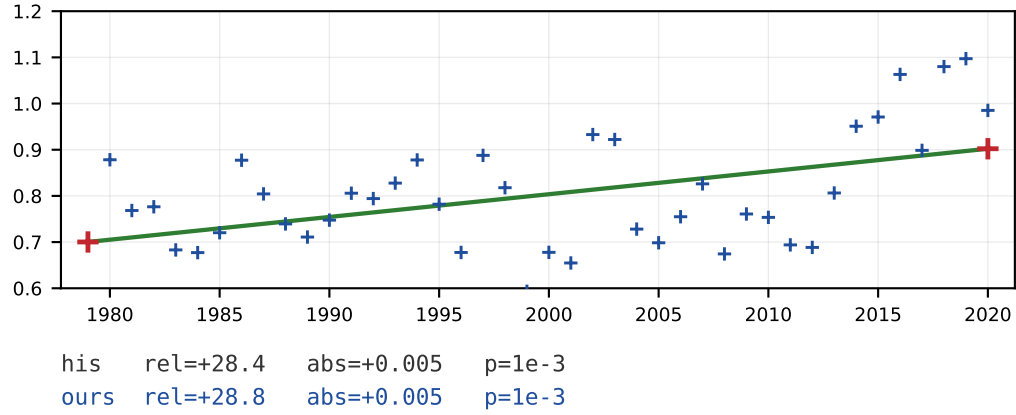

Brown energy dissipation rate
(f)

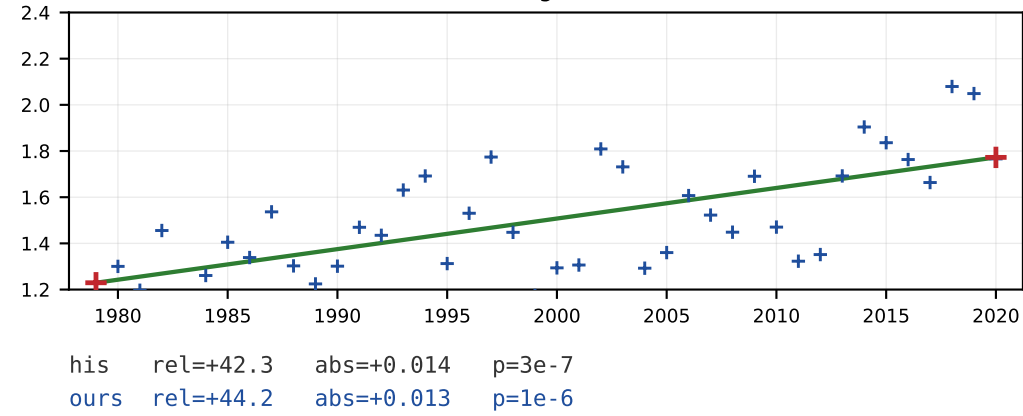

Wind speed
(m)

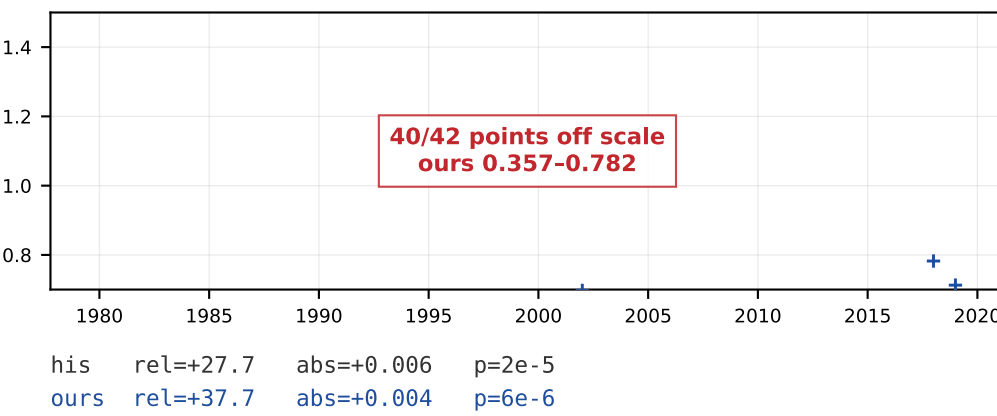

Negative absolute vorticity advection
(t)

Variant 1 of Ellrod's turbulence index
(g)

Wind speed times directional shear
(n)

Magnitude of relative vorticity advection
(u)
